XPERTBID | FEATURE PROPOSAL

Buyer Requests

Buyers post what they need. Sellers compete to supply it.

Client presentation

WHERE WE ARE

How XpertBid works today

1

Seller lists

A seller creates an auction for a product and sets it live on the marketplace.

2

Buyers bid

Buyers browse the auctions and place their bids on the products they like.

3

Auction closes

The auction ends and a winning bid is selected for the seller.

Today the seller always starts the conversation. Buyers can only respond to what is already listed.

THE OPPORTUNITY

A new way to buy: reverse the flow

TODAY: AUCTION

Seller lists a product

Buyers place bids

Winning bid selected

NEW: BUYER REQUEST

Buyer posts what they need

Sellers send their offers

Buyer reviews the offers

Inspired by the reverse-auction model used by AuctionNow.

FEATURE OVERVIEW

How the new flow works

1

Buyer requests

Posts the product they need with details, images, category and location.

2

Sellers notified

Only sellers whose categories and locations match are alerted.

3

Sellers offer

Sellers bid with the price they will deliver the product for.

4

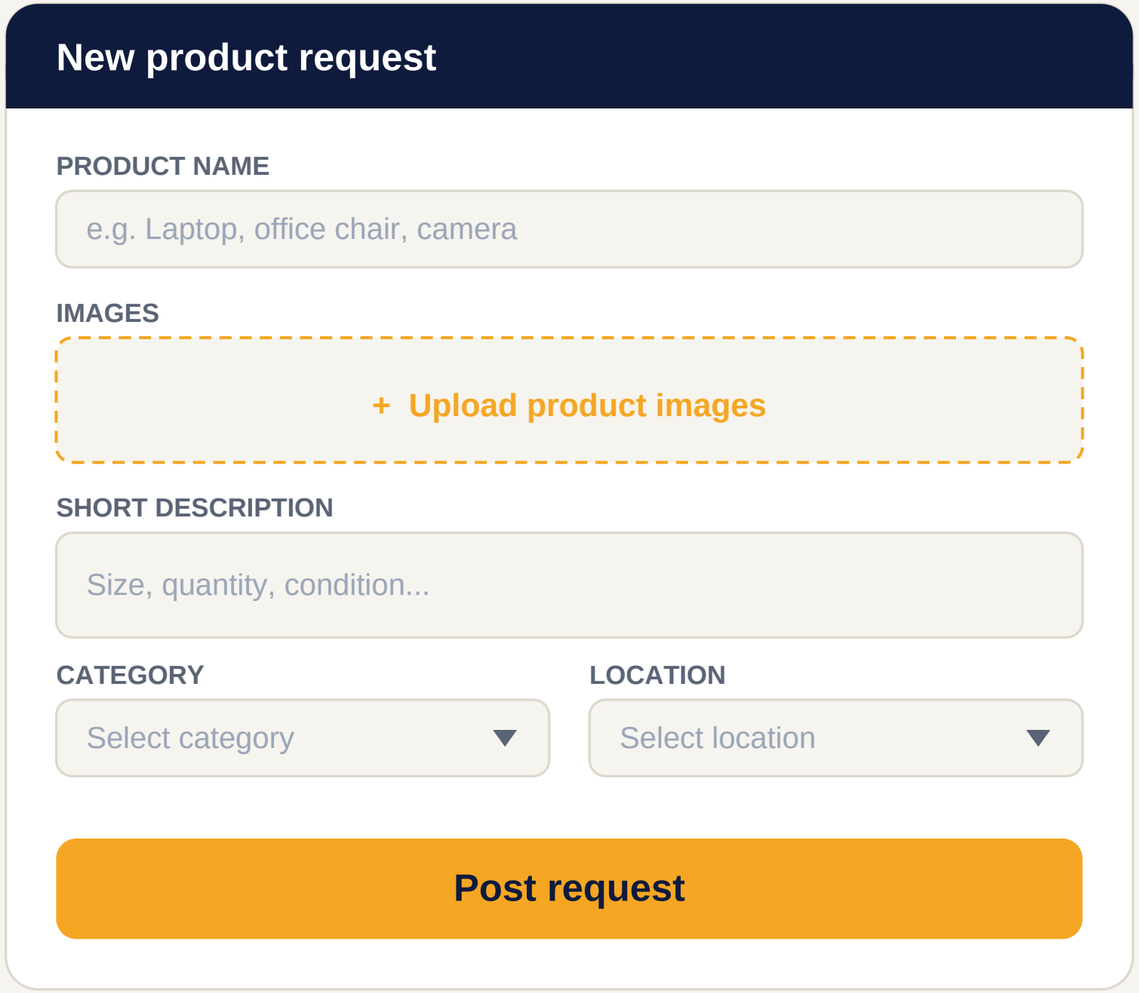
Buyer reviews

All offers for each product appear on one page for comparison.

The existing auction feature stays as it is. Buyer Requests is added alongside it.

BUYER JOURNEY

Posting a request



Product, images, description

Tell sellers exactly what the buyer needs.

Category

Decides which sellers are notified.

Location

Matched with seller delivery areas, so offers are realistic.

Multiple requests

Buyers can create a new request for every product they need, as many times as they like.

BUYER JOURNEY

Buyer dashboard: requests and offers

My requests

Laptop
3 offers

Office chair
1 offer

Camera
No offers yet

+ New request

Offers for: Laptop

A	**Seller A** Delivery in 2 days	**$ 450**	Accept / Reject: TBD
B	**Seller B** Delivery in 4 days	**$ 430**	Accept / Reject: TBD
C	**Seller C** Delivery in 1 day	**$ 465**	Accept / Reject: TBD

To be finalized in the meeting

How the buyer accepts or rejects an offer. Options are on the last slide.

Sample data for illustration.

SELLER JOURNEY

Seller profile: preferred categories and locations

S

Seller profile

Choose what you sell and where you deliver

PREFERRED CATEGORIES (select multiple)

Electronics | Furniture | Fashion | Vehicles

Home & Garden | Sports | Books | Toys

PREFERRED LOCATIONS

Country | State | City | Custom area

Pakistan | Sindh | Karachi | DHA Phase 6

Save preferences

Categories

Sellers pick as many categories as they sell in.

Locations

Country, state, city or any custom area they can deliver to.

Why this matters

These preferences drive the notifications. Sellers only hear about requests they can actually fulfill and deliver.

SMART NOTIFICATIONS

Matching requests to the right sellers

New buyer request

Product

Laptop

CATEGORY

Electronics

LOCATION

Karachi

Seller preferences checked

Seller A
Electronics | Karachi
Notified

Seller B
Furniture | Lahore
Not notified

Seller C
Electronics, Fashion | Sindh
Notified

Matching by category and location means sellers receive requests they can fulfill and deliver easily, and buyers get relevant offers faster.

Sample data for illustration.

VALUE

Benefits for everyone on the marketplace

Buyers

- Competitive offers arrive without searching
- Request anything, any time
- Compare all offers in one place

Sellers

- Leads that match what they sell
- Only requests they can deliver
- Notified without browsing

XpertBid

- A second way to transact beyond auctions
- More engagement from both sides
- Wider product coverage

DISCUSSION AND NEXT STEPS

Open question: responding to offers

When a seller sends an offer, how does the buyer respond? We would like to decide this together.

Accept / Reject

Simple and fast. The buyer picks one offer and declines the rest.

Chat with seller

Buyer and seller talk to clarify details before deciding.

Counter-offer

Buyer proposes a different price and the seller can respond.

Proposed next steps

1. Finalize the offer-response flow
2. Agree scope and timeline: [dates to be added]
3. Move into design and development
